

Question	Response
Comment on strengths and weaknesses of the instructor	Very good instructor. Provided us with lots of real world examples. Helped greatly to understand what was going on in the lecture part of economics.
Comment on strengths and weaknesses of the instructor	All strength no weakness
Comment on strengths and weaknesses of the instructor	The instructor helped out with problem sets and tries to help make the tests easier. He also helps out by helping raise the class average on assignments.
Comment on strengths and weaknesses of the instructor	Robert Dinterman was an excellent lab instructor. I really mastered this class through his lab sessions. I liked his style of presenting the information and examples. He made things much easier to understand.
Comment on strengths and weaknesses of the instructor	First Econ TA I've seen that speaks understandable English. He knew the course and content well, and taught it well. Seemed a bit nervous in front of people, which, given the situation and audience (no participation), is understandable.
Comment on strengths and weaknesses of the instructor	very good at explaining information.
Comment on strengths and weaknesses of the instructor	The instructor was extremely boring but he covered the material. He is a cool guy.
Comment on strengths and weaknesses of the instructor	Strengths: Definitely seemed eager or willing to teach. came prepared every class Weaknesses: Didnt always know how to explain a topic to the students.
Comment on strengths and weaknesses of the instructor	great at explaining things and coming up with examples that are easy to relate to. very effective use of time.
Comment on strengths and weaknesses of the instructor	On time

Comment on strengths and weaknesses of the instructor	On time, very open to questions, and always prepared
Comment on strengths and weaknesses of the instructor	Robert was a great instructor given the material.
Comment on strengths and weaknesses of the instructor	He seemed rather bored everyday and therefore never kept my attention because it seemed like he never wanted to be there. PLus just going over a worksheet everyday in lab isn't going to make things easier to understand. I hate economics because it does not make logical sense to me, so something a little more hands on may be useful.
Comment on strengths and weaknesses of the instructor	Very encouraging and willing to help students or respond to questions.
Comment on strengths and weaknesses of the instructor	He drew very helpful diagrams for all of the concepts. He was also clear and knowledgable of all of the topics.
Comment on strengths and weaknesses of the instructor	Mr. Dinterman was a good lab instructor and I felt like I learned more in the lab sessions than in the lecture, by far. While the lab concisely explained the economic concepts we went over, the lecture seemed to stray from the path a few times too many. Overall, the lab instructor was an effective teacher and I felt like I learned from his teachings.
Comment on strengths and weaknesses of the instructor	He has a great ability to teach in ways students can understand. He gets the message across very well with the youth, maybe because he is young himself.
Comment on strengths and weaknesses of the instructor	He sounded like he knew what he was talking about and if I had a questions he knew the answer.
Comment on strengths and weaknesses of the instructor	The instructor was very helpful and good at taking complicated economic ideas and synthesizing them for us. I often left lab feeling like I had a better grasp on lecture topics. It was also helpful when he held study sessions.
Comment on strengths and weaknesses of the instructor	Great at explaining all material. Took the time to explain difficult material. Great teacher. I would recommend him to everyone. Thanks for a good year!
Comment on strengths and weaknesses of the course	NONE

Comment on strengths and weaknesses of the course	The lecture wasn't very helpful, and I didn't really understand any of the material until we did examples and worksheets in the lab.
Comment on strengths and weaknesses of the course	The material itself is presented in a dull and uninteresting way.
Comment on strengths and weaknesses of the course	this course is 100% better than the lecture course. Everything I have learned in the lab is the only thing I've learned. The lab for that matter, i think could replace the lecture.
Comment on strengths and weaknesses of the course	Boring course
Comment on strengths and weaknesses of the course	The lab for this economics course was great. It really supported what was covered in lecture and the review sessions were extremely helpful.
Comment on strengths and weaknesses of the course	Its the only way to properly learn economics.
Comment on strengths and weaknesses of the course	The course is better than the normal course because it is smaller.
Comment on strengths and weaknesses of the course	great at teaching what the lecture was going over during the week, and even had great review for tests
Comment on strengths and weaknesses of the course	The course was interesting but at times a little complicated.
Comment on strengths and weaknesses of the course	his class is very informative and makes the class make since
Comment on strengths and weaknesses of the course	I don't think that the course really needs the lecture and the lab. Honestly, I never payed attention in the lecture, got all i needed to know from the lab, and did very well in the course.
Comment on strengths and weaknesses of the lab (if applicable)	This class was a lab and it was very appropriate.
Comment on strengths and weaknesses of the lab (if applicable)	As I said above, the lab seemed to be more rewarding than the lecture. The same concepts were covered, but everything was more concisely explained in the lab. The quizzes assigned helped in studying for the test, although I felt like the questions in the quizzes were much more difficult than the questions we went over in class.
Comment on strengths and weaknesses of the lab (if applicable)	Maybe work questions or give examples that sound like the quiz and problem set questions

Comment on strengths and weaknesses of the lab (if applicable)	Its the only way to properly learn economics.
Comment on strengths and weaknesses of the lab (if applicable)	his labs are really helpful and provide a more detailed analysis of the class
Comment on strengths and weaknesses of the lab (if applicable)	same
Comment on strengths and weaknesses of the lab (if applicable)	great at teaching what the lecture was going over during the week, and even had great review for tests
Comment on strengths and weaknesses of the lab (if applicable)	NONE
Comment on strengths and weaknesses of the lab (if applicable)	The lab was basically the only reason I could understand any of the material because we did examples rather than defining vocab in the lecture.
Comment on strengths and weaknesses of the lab (if applicable)	The lab was very helpful and usually got out early.
Other comments	Dinterman is awesome
Other comments	Rawrrr!!!!
Other comments	NONE
Other comments	good tims
