

Question	Response
Comment on strengths and weaknesses of the instructor	Robert Dinterman was an amazing course instructor. He had a great sense of humor and always wanted us to understand the material in the most clear and concise manner. He was always willing to help students after class and any other time that a student had a question. His lab outlines were fantastic and were a great study aid when in preparation for the Exams. He always was willing to go over questions for as long as students needed until they fully grasped the concept. He was also extremely prompt in returning e-mails. I got sick a couple of times throughout the semester and he always wrote me back immediately and sent the lab outline so I never felt behind at all. Robert has no weaknesses in his teaching methods.
Comment on strengths and weaknesses of the instructor	He's good and can explain things well.
Comment on strengths and weaknesses of the instructor	Bob was a great teacher who had all the resources we needed to learn and thus do well in the class.
Comment on strengths and weaknesses of the instructor	Prepared good work sheets and complemented the lecture nicely.
Comment on strengths and weaknesses of the instructor	He was very helpful in making the broad concepts of the class easier to understand, and put them in terms that most of us students would comprehend better. Very good lab instructor.
Comment on strengths and weaknesses of the instructor	Knew what he was talking about, knew how much the class could bare before we just zoned out.
Comment on strengths and weaknesses of the course	Pretty basic but still made you think.
Comment on strengths and weaknesses of the course	Reinforced fundamentals of economics
Comment on strengths and weaknesses of the course	The lab is probably better than the actual course.

Comment on strengths and weaknesses of the course	The lab is a great resource to have for the overall coarse since the lecture is so large.
Comment on strengths and weaknesses of the lab (if applicable)	Consistent with the course, reinforced general knowledge
Comment on strengths and weaknesses of the lab (if applicable)	The lab was comprised of in class time in addition to problem sets and quizzes. The lab was necessary to my comprehension of the course. I have only benefitted from the Lab, I can think of nothing that I found that was a weakness of this portion of the course.
Comment on strengths and weaknesses of the lab (if applicable)	Good complement to the lecture.
Would you like to nominate your instructor for an Outstanding Teacher Award? If yes, why?	No.
