

Question	Response
Comment on strengths and weaknesses of the instructor	He seemed to know his subject well and tried to break it down to laymans terms for those of us who didnt get the concept the first time around.
Comment on strengths and weaknesses of the instructor	The instructor was skilled at breaking down topic into easy to understand examples.
Comment on strengths and weaknesses of the instructor	Mr. Dinterman was always prepared with in class assignments that summarized that weeks lesson. He was also willing to explain further any material that you didn't fully understand.
Comment on strengths and weaknesses of the instructor	I felt that the instructor went over the material in more depth and detail, and actually took the time to make sure we understood what was being taught.
Comment on strengths and weaknesses of the instructor	The instructor explained the difficult material REALLY well. He knew how to teach the subject and if there were any questions, he would answer them thoroughly. He would involve us a lot and challenge us.
Comment on strengths and weaknesses of the instructor	He was always very active and made learning the material fun for the students. He also used examples that actually compared to us as college students so we could better understand what he was trying to explain.
Comment on strengths and weaknesses of the instructor	Very good teacher. Cleared up questions i had from the lecture. No complaints
Comment on strengths and weaknesses of the instructor	Very detailed explanation of difficult material. Questions were answered clearly. Lab material was very relevant to exams on the lecture.
Comment on strengths and weaknesses of the instructor	Strenghts: The teacher was very knowledgeable about the course and was able to explain all topics coherently and in an easy-to-understand manner. The teacher was also able to relate to students very well and presented himself in a way that was easy to talk to. He improved my understanding of the subject and was an excellent TA. Weaknesses: N/A
Comment on strengths and weaknesses of the instructor	Great instructor. He helped me to understand all of the concepts from lecture a lot better. Cannot think of any weaknesses.

Comment on strengths and weaknesses of the instructor	Great teacher, used practical examples that the class could relate to.
Comment on strengths and weaknesses of the instructor	He was very informative and knowledgeable, and never struggled to answer problems issued in class. It was a bit dull, but a lot of that was due to the class being held in a bland, windowless room.
Comment on strengths and weaknesses of the instructor	Great instructor
Comment on strengths and weaknesses of the instructor	Good explanation of graphs, its easier to understand when you use multiple colors
Comment on strengths and weaknesses of the instructor	Very great at explaining concepts that were harder to grasp in the lectures. The lab is what got me through the course.
Comment on strengths and weaknesses of the instructor	There wasn't much class discussion, we mostly just filled out notes and worksheets. Robert seemed to mean well, but he just
Comment on strengths and weaknesses of the instructor	Robert was, in my opinion, very effective. I enjoyed his style of teaching - he taught the material quickly, effectively, and calmly. He answered questions we had, and he distributed helpful worksheets and practice exams. I actually felt I learned more from him in the lab section than I did from Dr. Hyman in the lecture section.
Comment on strengths and weaknesses of the instructor	the instructor is awesome. He knows exactly what student need as a TA.
Comment on strengths and weaknesses of the instructor	He was good at covering all the material. giving relatable examples, but sometimes in the lab i felt bored or lost. lab kind of lacked enthusiasm. The worksheets were a good idea to help us follow along. I feel like some topics weren't covered that showed up on the tests.
Comment on strengths and weaknesses of the instructor	Robert did very well considering he had a mid afternoon Friday lab for a class 95% of the students couldn't care less about. He has good patience got the topics across well. Seemed frustrated most of the time, understandably.
Comment on strengths and weaknesses of the instructor	Mr. Dinterman did a great job in reviewing the material that Mr. Hyman taught us earlier in the week. He offered to help us anytime, whether that be in class or out of class. He was very helpful and a pretty funny guy in general. I enjoyed having him as my lab instructor, and I would recommend him to anyone looking to take Economics in the future.

Comment on strengths and weaknesses of the instructor	great job
Comment on strengths and weaknesses of the course	The timing of it made it a difficult class it was hard to stay focused on a friday afternoon but thats not the instructors fault.
Comment on strengths and weaknesses of the course	I like that we had a lab because I felt less like just a number on a sheet to an actual student who could ask as many questions as possible.
Comment on strengths and weaknesses of the course	The course was effective.
Comment on strengths and weaknesses of the course	More help should've been given for problem sets and quizzes. There should be a more CONSISTENT pattern of when problem sets and quizzes are due.
Comment on strengths and weaknesses of the course	the course is entertaining.
Comment on strengths and weaknesses of the course	Good economics course, helped me learn the subject.
Comment on strengths and weaknesses of the course	It was a good course, Economics just isn't for me though.
Comment on strengths and weaknesses of the course	The tests, dotlearn assignments, labs, and lectures all fit balanced nicely. My main problem would be dotlearn; it's frustrating to have a completely different website (other than webassign) for homework, though this may be unavoidable.
Comment on strengths and weaknesses of the course	Dinterman helped reinforce Hyman's lectures, and practice problems with the material. The worksheets he used every week were extremely useful for the problem sets, quizzes, and especially studying for the tests. Personally, he was also a friendly guy and he made himself accessible outside of class.
Comment on strengths and weaknesses of the course	Good supplement to the lecture.

Comment on strengths and weaknesses of the course	Quizes and problem sets were not clear enough. They were confusing at times. Could be more specific.
Comment on strengths and weaknesses of the course	Like I commented for the lecture section, the course is in my opinion too easy. I honestly did not learn much material while in this class.
Comment on strengths and weaknesses of the course	The course has been very challenging, but it has also taught me a lot about the subject of Economics.
Comment on strengths and weaknesses of the course	the course was not very interactive.
Comment on strengths and weaknesses of the course	The course tests were a lot harder than the actual subject. I feel there could have been better preparation for tests.
Comment on strengths and weaknesses of the lab (if applicable)	The labs were very useful. A lot of the times I wouldn't understand what's going on during the lecture, but I was less confused after the lab sessions.
Comment on strengths and weaknesses of the lab (if applicable)	Lab was very effective for the course.
Comment on strengths and weaknesses of the lab (if applicable)	The lab was formatted nicely, once a week, and yet still very helpful, especially for keeping up with dotlearn assignments.
Comment on strengths and weaknesses of the lab (if applicable)	I loved the lab because it was where I understood the bulk of the material because in class it was a lot easier to get distracted.
Comment on strengths and weaknesses of the lab (if applicable)	the lab helped me alot
Comment on strengths and weaknesses of the lab (if applicable)	Lab helped solidify materials taught in lecture better than just reading the text

Comment on strengths and weaknesses of the lab (if applicable)	The lab helped me take the information from the lecture and apply it to my everyday uses. I could then see how the information applied to me on a daily basis. It was effective in allowing me to connect the information from the lectures to detailed examples.
Comment on strengths and weaknesses of the lab (if applicable)	The labs were very helpful in re-teaching the material because Economics can sometimes get confusing. It was great to be able to review in our small labs, and it also helped in preparing to study for any upcoming exams. Overall, labs are a great way to help learn the subject of Economics.
Comment on strengths and weaknesses of the lab (if applicable)	Strengths: The labs were a very helpful aspect of the class and increased my understand of the subject, especially for the harder ideas of the class. Weaknesses: None
Comment on strengths and weaknesses of the lab (if applicable)	Lab is essential to this class. It condenses all of the material we learned in lecture to something actually understandable. Hyman provides many examples in class but cutting to the core what we need to know is done in lab.
Comment on strengths and weaknesses of the lab (if applicable)	The lab was very effective - I wouldn't object if the class was simply composed of the once-a-week lab.
Comment on strengths and weaknesses of the lab (if applicable)	The lab helped more than the lecture. (smaller setting, more direct materials, whiteboard drawings, examples)
Comment on strengths and weaknesses of the lab (if applicable)	the lab really helps
Comment on strengths and weaknesses of the lab (if applicable)	The lab was a good idea in theory, but one small class once a week isn't enough to make up for the 400+ person lecture.
Comment on strengths and weaknesses of the lab (if applicable)	I felt like the lab was much more valuable than the class itself. That might be due to the fact that there were many more students in the class than the lab.
Other comments	Rob Dinterman was a great lab TA.
Other comments	=D
Other comments	Nothing really.
Other comments	Overall great teacher. Knows material very well, and uses a grading scale that is acceptable.
Other comments	Good job!
Other comments	I would love to have TA Like Dinterman for all my labs
