

Question	Response
-----	-----
Comment on strengths and weaknesses of the instructor	Robert was very prepared for class and was overall a very effective teacher. He was a much more effective communicator than my previous economics teachers. He also cracked jokes every now and then to lighten the mood.
-----	-----
Comment on strengths and weaknesses of the course	The material wasnt fairly difficult, but Robert made understanding it easier. He will go over some principals from ec201 if need be to make sure you understand. Different from other economics classes in that you actually had to learn the concepts not memorize.
-----	-----
Comment on strengths and weaknesses of the lab (if applicable)	not appplicable
Comment on strengths and weaknesses of the instructor	With my experience the teacher had a large understanding of what he spoke about. He didnt waste our time, he said what he had to say in an effective and timely matter and let us out after that. He did allow us time to ask questions if we had them but i never did because he was very effective with my learning type.
-----	-----
Comment on strengths and weaknesses of the course	I saw no definitive strengths or weaknesses with the course
-----	-----
Other comments	I like the teacher in particular, although he did go to clemson he was easy to learn from. the examples used in class allowed us to understand because he often used things that we could relate to. I would reccomend everyone take this class
Comment on strengths and weaknesses of the instructor	Very good instructor, taught the material well, and his grading was very fair. Tests were not overly difficult, and were a good indication of material learned. Quizzes helped facilitate the notes and the reading. The class rarely participated, however, and I never wanted to answer question even when I knew the answer because no one else would ever talk. Maybe he could have called on people earlier in the year to instigate participation. All and all, very good instructor, and

instructor	have recommended him to several of my friends for next semester.
-----	-----
Comment on strengths and weaknesses of the course	Course in general was good, not too difficult, interesting stuff because we could see stuff we were learning about happening now. Instructor taught the information well, made the material more enjoyable and easier to understand.
-----	-----
Other comments	As a soccer fan, I must say Mr. Dinterman bears a great resemblance to Manchester United's Bulgarian striker Dimitar Berbatov. Just a fun fact for all you readers.
Comment on strengths and weaknesses of the instructor	I thought he did a good job of explaining the more difficult material and making it simpler to understand. He was definitely fit to teach the subject and was clearly knowledgeable on the material. I thought he did a very good job overall.
-----	-----
Comment on strengths and weaknesses of the course	Overall I thought the course provided useful information and was interesting.
Comment on strengths and weaknesses of the instructor	Mr. Dinterman has been the best Economics teacher that I have had. He explains difficult concepts in a manner that I can understand.
Comment on strengths and weaknesses of the course	This was a difficult course because there is so much information. I felt that we were given a basic understanding of the concepts and then asked to take it a step further on the test which was not easy for a course like this one. I also did not feel like the book was very helpful as an aid for learning the material.
Comment on strengths and weaknesses of the instructor	A strength is that he was always enthusiastic about teaching whatever it was we were learning that day. A weakness was when it came to explaining questions we asked in class. He had a weird way of taking a long way to explain something that would just leave you more confused. Instead of just telling us the answer, he would make us figure it out ourselves basically, but when you are confused to begin with, that isn't the best idea. Another weakness was with the third exam. I have never had a teacher completely change the format of a test, especially by the third one. That was a big surprise.
-----	-----

Comment on strengths and weaknesses of the course	Overall the material was good. The quizzes were kind of annoying because a few at the beginning of the semester had questions that were easier to find. They got progressively harder to do on your own.
Comment on strengths and weaknesses of the instructor	my EC 201 teacher was greek and I had a very difficult time understanding her, so I was just thankful that I could understand him when he spoke.
-----	-----
Comment on strengths and weaknesses of the course	Unfortunately, I had 3 classes back to back and EC202 was the last one and the course itself didn't interest me enough to keep my attention all the time. That is more than likely just because I dislike economics.
-----	-----
Other comments	I like how he incorporated school spirit into the course because classes aren't all that college is about.
Comment on strengths and weaknesses of the instructor	Good at explaining material, didn't rush the class, always answered questions
Comment on strengths and weaknesses of the instructor	He explains the material in a way that's familiar to the students and makes things interesting with his creative examples. He answers questions to his best ability and lets the students participate in class.
-----	-----
Comment on strengths and weaknesses of the course	The class was challenging, but not impossible to understand.
-----	-----
Other comments	Although I don't particularly enjoy economics, Robert is overall a good teacher.
Comment on strengths and weaknesses of the instructor	Robert Dinterman was a great instructor. His is very enthusiastic about economics and constantly made us laugh with his explanations. I really enjoyed this class and would take another class that Dinterman teaches.

-----	-----
Comment on strengths and weaknesses of the course	The class gives a great basic understanding of macroeconomics.
Comment on strengths and weaknesses of the instructor	Rob is the man
-----	-----
Comment on strengths and weaknesses of the course	economics lacks interesting topics
Comment on strengths and weaknesses of the instructor	The material for this class was pretty boring, he did a good job of explaining it.
Comment on strengths and weaknesses of the instructor	He does a good job of explaining concepts. He also uses references that, as students, we pay attention to and can understand.
Comment on strengths and weaknesses of the instructor	Knew what he was talking about and seemed to enjoy teaching the subject. Wish there were more aids to learning the material (ex:study guides) but overall a good economics professor.
-----	-----
Comment on strengths and weaknesses of the course	Typical economics lecture

Comment on strengths and weaknesses of the instructor	I like how Robert used college-age interests to relate to economic situations. It made the class more interesting. I have no weaknesses to report here.
-----	-----
Comment on strengths and weaknesses of the course	The course was challenging but broad, as I expected from a 200 level economics class. I did feel that I spent a large portion of the class looking at graphs, graphs and more graphs. It's not the easiest way for me to learn complex concepts and I am sure others feel the same way.
-----	-----
Comment on strengths and weaknesses of the lab (if applicable)	Not applicable
-----	-----
Other comments	I enjoyed this course very much this semester. We didn't solve any of the world's economic problems but we did learn a lot.
Comment on strengths and weaknesses of the instructor	Great teacher!
-----	-----
Comment on strengths and weaknesses of the course	Boring material.
-----	-----
Other comments	You rock Robert
Comment on strengths and weaknesses of the instructor	The instructor was very down to earth and taught at an understandable manner but, taught a littl differnt than the text book. He did relate examples to real life experiences that we could relate to which made it more interesting. The instructor taught a little different than the book which was his one flaw. When it came time to study i had to study the book becuase the notes from class were vague. The instructor definently knew what he was talking about and had full understanding off te subject and always had a good answer to class questions but, we had a quiet class.
-----	-----

Comment on strengths and weaknesses of the course	The course is a very conceptual course that has been tough to learn and have found my best understandings by reading the book.
Comment on strengths and weaknesses of the instructor	He was very straightforward with info.
-----	-----
Comment on strengths and weaknesses of the course	very interesting.
Comment on strengths and weaknesses of the instructor	Good analogies and explanations
Comment on strengths and weaknesses of the instructor	He was up to date on a lot he taught us since he's a grad student but I thought he could have taught some stuff better and made it a little more interesting. I had a hard time paying attention because Econ doesn't really interest me and he never could grab my attention.
-----	-----
Comment on strengths and weaknesses of the course	Well it's Econ... not much to say about it.
-----	-----
Other comments	It wasn't a horrible course but it could have been a little better taught.
Comment on strengths and weaknesses of the instructor	He was a good guy. The learning atmosphere he created was effective. He was straight forward and told you what you needed to know. He was a very good teacher.

Comment on strengths and weaknesses of the instructor	He was very enthusiastic about teaching the course and knew exactly what he was talking about.
-----	-----
Comment on strengths and weaknesses of the course	The course was very time-demanding and the tests often threw curveballs.
Comment on strengths and weaknesses of the instructor	well taught class!
-----	-----
Comment on strengths and weaknesses of the course	great course
-----	-----
Other comments	like the quizzes
Comment on strengths and weaknesses of the course	I think it would have been better if all of the quizzes were due the same day every week. That is the way it is in my ACC 200 class and remembered to do the quizzes every week because they were all due at the same time. I missed a lot of quizzes in this class because they were due on random days.
Comment on strengths and weaknesses of the instructor	Instructor became a better teacher as the semester progressed. He described difficult subjects well and gave visual graphs on the board to illustrate the movement of the economy as effected by different economic forces. Gives great incentives to show up to class other than just a participation grade. Gives great incentives to support university athletics.
